

Introducing...

Ultra Tec

THE FANTASY MACHINE ... *Free Your Imagination!*

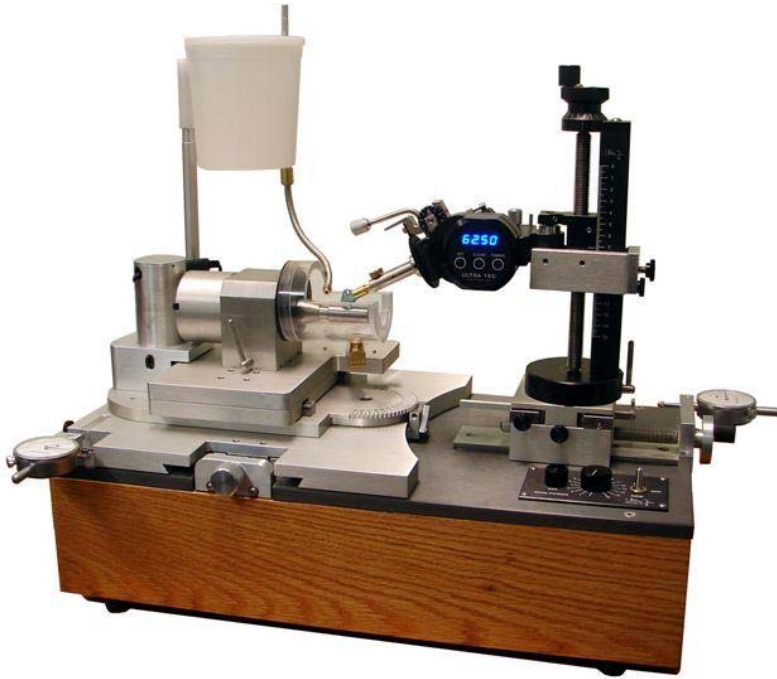

Multi-axis precision and repeatability – **POSITIONING MECHANISMS** – FOR EVERY LINEAR AND ANGULAR DIRECTION! Create impressive intricacy — or intriguing simplicity. For the experienced faceter who wants to move on to the challenge of fantasy designs

For jewelry – interesting and unique cuts for rings and pendants – or, displayed geometric sculptures, consisting of interesting shapes and reflections.

UNIQUE FEATURES include rapid home positioning, dial indicator readouts, independent controls of rotation and reciprocation...and... Two motor positions – 0° and 90° -- reciprocation in line with cutting axis.

TOOLS. Basic tool sets are provided with the unit -- cylindrical and slitting types. Tool-holders handle standard tool shank diameters for the many off-the-shelf tools available from Ultra Tec or other companies.

Price: \$3,680 (note: price does not include Mast--picture shows faceting Mast transferred from your faceting machine)

Think about it... the Fantasy Machine can be used in "Concave cutting mode"-- relatively easy to accomplish, and likely your initial ventures --but inevitably you will be drawn into the enhancements of Fantasy Cutting. A search on the Internet will provide many accomplishable ideas. With Fantasy cutting -- the level of challenge increases -- it's a pathway to your "far out" imaginings. No limits!

Also available...

CONCAVE FACETING MACHINE

Move to another level! Concave faceting is a way of making less expensive gem rough into objects of enhanced brilliance—and enhanced value

You bring your Faceting Mast, with its faceted stone, to the Concave Machine, there's a fast lining-up—and then, add the concave facets. The results are exciting. This machine gives you precision and repeatability – and micro-adjusting, for polishing precision

UPGRADEABLE The Concave Machine can be upgraded later to include any of the Fantasy Machine features

Price: \$2,280 (note: price does not include Mast--picture shows faceting Mast transferred from your faceting machine)
