

THE V2 FACETING MACHINE

...The World's Finest Faceting Machine!

The Ultra Tec Faceting machine—celebrating 45 years of excellence and prize-winning performance—is a machine for serious hobbyists and professionals. Its simple “elegant” design provides the faceter with the pleasure of stones approaching perfection—and with maximum yield and value.

Ultra Tec provides the advantage of a proven design plus the evolutionary upgrades of advancing technology. No “penny pinching” shortcuts – no untested modifications: all machined components (no castings), all ball bearings (no bushings) plus precision of execution. That adds up to a superior faceting machine – for you.

The Ultra Tec is for people who love faceting!

We once had an ad that said -- “If you’re sure you’re coming back to this World again, don’t worry. You can get an Ultra Tec next time around.”

VISIT OUR WEBSITE – www.ultratec-facet.com. You can sign up for the **SomeTimes**, Ultra Tec’s (about) monthly newsletter – we try to keep Ultra Tec “cousins” well informed.

Since 1972, Ultra Tec has been directed by a continuous management – and that continuity projects into the future. Many years ago we committed to high quality manufacture, and we have stood behind that pledge. The rule that governs our design efforts is that Ultra Tec product ***has to be good***, No cheapie solutions, no “almost good” – and we always felt that there would be enough customers who wanted genuine quality. We were right – and Ultra Tec continues to thrive.

Ultra Tec people are trained to listen to the customer and to treat the customer right – we intend to be the best, not only in initial product but in follow-up customer service as well.
