

V5 CLASSIC FACETING MACHINE

...A NEW MEMBER OF OUR PRODUCT FAMILY!

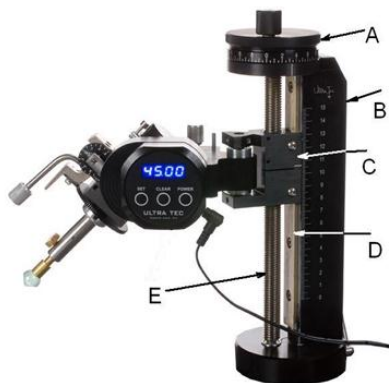

The V5 is an upgraded unit based on the proven architecture of the Ultra Tec design. The Ultra Tec Classic Faceting machine—celebrating almost 50 years of excellence and prize-winning performance—is a machine for serious hobbyists and professionals. Its simple “elegant” design provides the faceter with the pleasure of stones approaching perfection—and with maximum yield and value.

Ultra Tec provides the advantage of a proven design plus the evolutionary upgrades of advancing technology. No “penny pinching” shortcuts – no untested modifications: all machined components (no castings), all ball bearings (no bushings) plus precision of execution. That adds up to a superior faceting machine – for you.

After evaluating the V5 during its testing phase, under “real world” conditions, professional faceter **John Dyer's** report was **"FANTASTIC!!!"** (the bold print and 3 exclamation points were his).

Firm, virtual "no flex" performance, and double-fast adjusting...

FEATURES OF THE V5 MAST

- (A) Larger diameter Vertical Knob – easy to read
- (B) Increased cross-section of Post (+50%) – non-flex stability
- (C) Bifurcated Riser Block – non-flex stability
- (D) Dovetail track for vertical positioning – non-flex stability
- (E) Fast double-lead Leadscrew -- doubles adjusting speed

The motivation for the V5? It grew from conversations and emails with faceters - several of them engineers and several faceting professionals, people who were happy with their V2 machines, but wished for some feature of improvement . It amounted to a "wish list". We listened.

Order Codes:

1607.5CDR ULTRA TEC V5 Classic Faceting Machine (digital) \$ 4,880
